

WHAT IS CLAIMED IS:

1. An attention getting device, which comprises:
a standing board, having a standing surface;
a flashing element, having a twinkling light body outwardly and having a circuit
5 connected to a battery behind said twinkling light body and inside said flashing
element, and having a back cover which is made of ferrous material; and
a magnet with magnetism;
thereby, said flashing element can twinkle and mutually attract with said
magnet on a back surface and said standing surface of said standing board
10 respectively so as to attract the attention and vision of the people.
2. An attention getting device as claimed in claim 1, it further comprises a
message element connected to said standing surface for conveying message.
3. An attention getting device as claimed in claim 1, wherein both sides of said
standing surface of said standing board can be bent backwardly and then bent
15 centrally to form a notch for positioning said message, wherein, said standing board is
made of transparent material, preferably.
4. An attention getting device as claimed in claim 1, wherein said flashing
element is turned on by screwing tightly said back cover to said body and turned off
by screwing loosely said back cover to said body.
